

Tek-NiqueInk analyzes all costs associated with printing a document. Our Total Cost of Ownership (TCO) model enables our clients to pinpoint exactly how much it is costing them to produce a document within their print environment as it relates to the following:

- Product Costs
- Repair Costs
- Delivery Costs
- Inventory Costs
- Preventative Maintenance Costs
- IT Department Support Costs
- Lost Employee Productivity Costs
- Transaction and Administrative Costs

Once these costs are pinpointed, Tek-NiqueInk then, offers cost management solutions designed to provide the Lowest Costs of Ownership (LCO). The result?

- Lower Transaction and Administrative Costs
- Improved Employee Productivity
- Reduced IT Support Requirements
- Reduced Repair Costs
- Improved Performance
- Eliminated Delivery Costs
- Eliminated Inventory Carrying Costs
- Sharper Print Quality
- Increased Control and Accountability

Our goals are to create less end-user downtime, to reduce IT interaction for print issues, create greater print quality, and to extend the lifecycle of your print devices.
